

Getting Titles Right

AN OVERVIEW OF WHAT TO DO AND NOT TO DO

When to use your title

Physiotherapists always use their professional title when providing physiotherapy services.

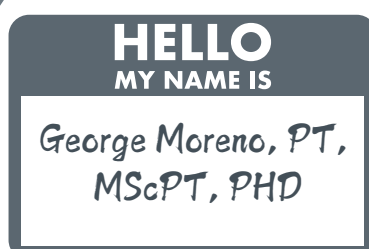

Professional designations

"Physiotherapist" and "Physiotherapist Intern" are professional designations that indicate you are licensed to practice in Alberta. Always list them immediately after your name.

Doctor title

Physiotherapists are not allowed to use the title "Doctor" or prefix "Dr." when providing health services or promoting health services to the public.

Specialist

Physiotherapists may only use the title "Clinical Specialist" or term "specialist" if they have completed an approved program and gained authorization from the Registrar.
